- Do not use it in outdoor or humid environments.
- Make sure the machine is away from heat sources. Do not place it on hot surfaces and near open flames.
- Before use, make sure your hands are dry.
- During use, do not leave the machine or make it be unattended.
- Do not turn on the product for a long time.

**Product Description (Figure A)**

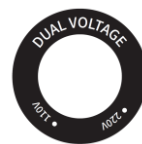

The Princess 302300 double-pressure mini-portable pan can easily meet the cooking and water heating needs.

1. Lid
2. Dedicated stainless steel 304 cooker
3. Stainless steel 304 heating plate
4. Host
5. Power indicator
6. Heating indicator
7. Switch / function switch
8. Rotate the pot handle
9. Power cord / plug
10. Voltage conversion button

## Before the First Use

- Please remove electrical appliances and accessories from the carton. Remove the protective film or plastic bag from the unit.
- Place the unit on a flat, stable surface, and make sure that there is at least 10 cm clearance around the unit. This device is not for installation in cabinets or outdoors.
- Before using the appliance for the first time, please wipe all removable parts with a damp cloth.
- Clean the stainless steel pot with white vinegar, neutral detergent or flour water. Do not use corrosive cleaning tool.
- When the product is used for the first time, the heating plate may be wax residue in the manufacturing process, please make the machine burn for 10 minutes until wax evaporates completely. (There may be slight white smoke therefrom, which is normal phenomenon)
- **Before powering on the product, be sure to check that the supply voltage is consistent with the bottom voltage setting.**
- Wrong voltage will cause product damage!
- If this product is preset to 110V / 60Hz, please check the local voltage. If you need to adjust the voltage setting, turn the voltage switch button at the base of the machine and turn it to the correct voltage with mini screwdriver.

## Operational Applications

1. Turn the power cord around and place the product on a smooth, reliable surface.
2. Wash the dedicated cooking pot and ingredients, serve it with food, add right amount of water, and place the dedicated pan on the heating plate, then cover the lid.
3. Be careful not to pack more than 600ml of food, or it will extend the cooking time or failure of cook.
4. Turn the power on and the indicator will light. Heating after some time, and wait the food to be cooked, then you can eat it.
5. Power the machine off, switch the function selector button to "Power", and unplug it.
6. Be careful not to use corrosive cleaning solvents when you unplug it before cleaning.
7. After use, please wait until the heating plate is fully cooled, and then wind up the power cord, placing the plug into the base of the product for storage.

※ Do not open the product for a long time; this product is for cooking small amount of materials, please power it off upon completion of cook.

※ When the surface of the product is heated, the power cord and other nearby equipments can not

touch the heated part of the product. Do not touch the heated part, otherwise there will be risk of burns.

※Please avoid the danger of a child touching the product in use.

※The base of the pot is specially designed. The heating function can not be replaced with ordinary container. Other heating equipment is not recommended, either.

### Common Faults and Handling

This product complies with Taiwan safety regulations. If your product does not work properly or if the heating is dysfunctional, please unplug it immediately and refer to the following table. If the failure remains, please contact your local dealer or call center.
