Garment Steamer

01.332848.02.001

PARTS DESCRIPTION

PARTS DESCRIPTION

1. Steam nozzle
2. Steam hose
3. Multi-functional hanger
4. Telescopic bar
5. Pole locking knob
6. Water tank
7. Switch knob
8. Base
9. Wheels
10. Water drain
11. Fabric brush
12. Pants press

IMPORTANT SAFETY INSTRUCTIONS

Read all instructions before using your Princess product. By ignoring the safety instructions Princess cannot be held responsible for the damage. When using an electrical appliance, basic safety precautions should always be observed, including the following:

IMPORTANT: This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children shall not use or play with this appliance. Close supervision is necessary to keep appliance and cord out of reach of children during use.

WARNING

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR INJURY:

- Never move the appliance by pulling the cord and make sure the cord does not become entangled. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons to avoid a hazard.
- The appliance must be placed on a stable, level surface.

- The user must not leave the device unattended while it is connected to the supply.
- This appliance is only to be used for household purposes and only for the purpose it is made for.
- To protect yourself against an electric shock, do not immerse the cord, plug or appliance in the water or any other liquid.
- **CAUTION:** In order to avoid hazard, this appliance is not intended to be operated by means of an external timer or separate remote control system.
- To prevent fire or shock hazard do not expose this appliance to rain or moisture.
- Do not allow children to use the device without supervision.
- Always switch off and remove the power cord from the electrical outlet before changing accessories or approaching parts that move in use.
- Always remove the power cord from the electrical outlet if it is left unattended and before assembling, disassembling or cleaning.
- **DO NOT** overfill.

- Only use the appliance with the appropriate connector.

- Surface are liable to get hot during use.
- Warning: Serious injuries can occur in case of misusing the appliance and accessories.
- WARNING: always unplug the garment steamer before attaching or detaching the fabric brush.
- WARNING: do not use the steamer directly on the body, animals, or while wearing the garments.
- Keep the appliance and its cord out of reach of children less than 8 years of age when it is energized or cooling down.
- Do not open the waterreservoir during use.
- Care should be taken when using the appliance due to the emission of steam.
- Unplug the appliance during filling and cleaning.

- **THIS PRODUCT IS INTENDED FOR HOUSEHOLD USE ONLY.** Do not use this appliance for anything other than its intended use. Do not use outdoors.

4

Illustration 1:

- Take the appliance and accessories out the box. Remove the stickers, protective foil or plastic from the device.

- Loosen the lock nut of the rod. Place the telescopic pole and lock it. (Picture 1)
- Unlock the telescopic pole lock to extend the post to the desired height and then lock it in the right place. (Picture 2)
- Attach the hanger to the top and lock in place. (Picture 3)
- Connect the hose to the base of the hose connector. Screw the hose connector nut into place. (Picture 4)

FABRIC BRUSH ASSEMBLY

Illustration 2:

- Turn off the appliance, wait until the steam stops spraying out of the nozzle.
- Place the rods of the fabric brush onto the steam nozzle.
- Press the brush to the steam nozzle and lock in place.

- Install the trouser press on the bottom of the steam nozzle and lock it. Put the pants in the middle between the steam nozzle and the trouser press, push the handle with one finger, and pull the steam nozzle downwards, This will iron the pants.

BEFORE THE FIRST USE

- When operating the appliance for the first time, allow it to steam for a few minutes. This will remove any impurities and odours that might have been left by the manufacturing process. You may want to try the steamer on an old piece of fabric before steaming your garment the first time.
- There may be leakage from the steam nozzle if the garment steamer temperature is not high enough to vaporize water and create steam. therefore, ensure that the garment steamer is always preheated for 2-3 minutes prior to use.
- To avoid an electrical circuit overload, it is recommended that no other appliances are plugged into the same circuit as your garment steamer when it is in use.
- The garment steamer is easy to use and is perfect for removing wrinkles from garments and curtains as well as refreshing furnishing fabrics.
- If using the garment steamer without the fabric brush, keep a distance of at least 5cm between the steam nozzle and the garment.
- Do not directly hover the garment steamer over metal accessories.

Filling the water tank

- Take out the water tank and unscrew the water tank nut.

- Fill the tank with water (the temperature of the water should be under 50 °C).
- In order to prolong the life of the appliance, we recommend you to use distilled water.
- Do not use the appliance if the water tank is nearly empty or if there is water shortage during use, this will damage the appliance.

USE

- The high-temperature steam spraying from the nozzle can only soften the garment fabric. Hold the garment with one hand, and hold the handle of the steam nozzle with the other. Touch the steam nozzle to the garment tightly, moving it in an up and down vertical motion. The high-temperature steam will remove wrinkles.
- Place the ironing board to the pocket and press the nozzle on the pocket gently. Move the nozzle up and down to shape the garment by high temperature steam.
- Hold the edge of both sides of the garment tightly when steaming the bottom of the garment. Steam in different directions until the fabric is wrinkle free. Be careful about the hot steam spraying out of the steam nozzle.
- Press downward for a longer time on the garment collar, and steam it back and forth.
- Straighten the sleeves, move up and down to remove wrinkles.
- Steam the back of the garment after finishing the front.
- After using the appliance, press the power button to turn it off. Disconnect the power plug out of the socket.
- Take off the water tank and empty the remaining water from the tank.

CAUTION: the high temperature can reach 180 °C, please confirm whether the material is high-temperature resist or not before steaming. Do not leave the spraying panel on the same spot for a long time to avoid damage to the garment.

CAUTION: when not using the appliance and before storage, continue steaming until the water tank runs out of water, then turn off and unplug the appliance and wait until the appliance is cooled down completely.

TROUBLESHOOTING

Problem	Possible cause	Solution/Tips
The unit fails to steam. Indicating lamps do not illuminate.	Is the plug not inserted in the mains socket correctly Household circuit breaker is tripped.	Insert the plug correctly. Reset the circuit outlet, check the fuse of your mains connection or contact a qualified electrician.
The unit fail to steam. Indicating lamps illuminate.	Mineral build-up in the unit. The water tank is empty.	Follow the removal mineral build procedure to remove the mineral residues. Refill the water tank.

Excessive gurgling sound from hose or steam nozzle.

condensation in hose.

A gurgling sound is normal during the steam process. If there is an excessive noise, hold the hose vertically to allow water to run back into the water tank.

EN

CLEANING AND MAINTENANCE

How to use the drain plug

- When the garment steamer is not in use for a long time, the water inside may get deteriorated, or even breed bacteria.
- A gray drain plug is set at the bottom of the appliance. Screw the drain plug anticlockwise to drain the water reservoir.
- After the reservoir is empty, replace and tighten the drain plug to avoid the water to flow out.

Removal mineral build-up

To reduce the accumulation of minerals in the steamer, the use of demineralised or distilled water is recommended. Follow the steps below to remove the built-up mineral:

1. Turn off the unit and unplug the power cord .
2. Remove the steam hose and the telescopic pole.
3. Drain the water reservoir.
4. Mix a solution of 50% vinegar and 50% water, in general 2 cups of mixture is sufficient.
5. Pour the mixture slowly from the hose connector to the water tank.
6. Continue to pour the mixture into the hose connection until the water reservoir is about half full, near the top of the hose.

7. Wait for about 40 minutes.
8. Drain the mixture by unscrewing the drain valve over a sink or tub.
9. Pour clean water into the hose connector and the water tank and let it drain. Repeat this step until the vinegar smell disappears.
10. Reassemble the unit.
 - When not using the appliance and before storage, continue steaming until the water tank runs out of water, then turn off and unplug the appliance and wait until the appliance is cooled down completely.
 - Do not put the appliance in water. use a dry clean cloth to dry the appliance, no special cleaning agent is needed.
 - Make sure the main body is dry before storage or packing.
